

PORTABLE ELECTRIC RAIL JACKS

THE ONLY JACKS MANUFACTURED WITH A WHITING BUTTRESS THREAD

For over 80 years, Whiting jacks have earned the reputation as one of the most reliable, reputable and long-lasting locomotive and railcar lift jacks in the world.

FEATURES

BUTTRESS THREAD

- The load screw in each Whiting jack is a machined buttress thread
- The buttress thread has an inherent self locking feature which makes them ideal for lifting equipment applications

SCREW-IN COMPRESSION

- Our "in compression" design eliminates screw issues when the jacks are under load

SELF LOCKING

- Jacks are self locking in case of power outage
- **SYNCHRONIZATION**
- Jack motors are extensively tested and synchronized, eliminating the need for expensive monitoring equipment

ELECTRICAL CONTROLS

- All electrical components are UL/CSA approved

MOTORS

- Dependable, long-lasting hoist rated Class B motors

CONTROLS

- Can be operated individually or in sets

LIFTING BRACKETS

- Lifting brackets can be modified to any configuration to suit the customer's lifting application

PORTABILITY

- Moved easily on high diameter wheels
- Can be lifted with an overhead crane

ADDITIONAL SERVICES
