## **GENERAL INFORMATION AND IDENTIFICATION**

4000 Horsepower Six Motor AC Traction Diesel-Electric locomotive. 4000 Traction HP Controlled

Locomotive SD70MAC

Locomotive Model Designation

New Road Numbers (Formerly TFM 1600 - 1674) KCS 3900 - 3974

#### **TYPE**

AAR designation (C-C), Common designation (0660)

#### **NOMINAL DIMENSIONS**

Length, pulling face of Coupler to Truck Center of Rotation	11'-10"
Distance between Truck Rotation Centers	50'-4"
Truck wheel base	13'-8"
Length over coupler pulling faces	74'-0"
Width over handrail supports	10'-3 3/4"
Track gauge - Standard	4'8 1/2"
Diameter Wheels - New	42"

#### **TRUCKS**

**HTC-R Radial Trucks** 

#### **WEIGHTS AND SUPPLIES**

Total loaded weight (approximate) 415,000# +/-5,000# Based

on inbound core

Fuel (usable) 4,890 gal.

Sand (total, front and rear) 56 cu. ft. (28 cu. ft. at each

end)

Cooling System 276 gal.
Lubricating Oil 436 gal.

#### **CLEARANCES**

The basic locomotive and all options are in compliance with AAR Plate "L" under all loading conditions and wheel sizes.

## **CURVE NEGOTIATION**

Single unit 213' Radius - 26.9 deg

Curve

Two SD70MAC units coupled 256' Radius - 22.4 deg

Curve

Single unit coupled with 50 ft. box car 373' Radius - 15.4 deg.

Curve

#### **PERFORMANCE**

Temperature Range -40 to + 115 F

Gear Ratio85:16Maximum Operating Speed70 MPHMaximum Speed at Full Horsepower70 MPH

Continuous Tractive Effort at Full Horsepower 137,000 lbs. TE @ 9.2 mph

Starting Tractive Effort 175,500 lbs. TE Peak Dynamic Brake Effort 81,000 lbs.

#### HORSEPOWER RATING

The SD70MAC locomotive develops 4000 traction horsepower at 904 RPM under AAR conditions.

Engine 16 cylinder 710 G3B

Emissions Tier 1

Alternator TA17 -6JBE-CA7B
Engine / Locomotive Control Systems EMDEC, EM2000

Traction Control System Siemens GTO Inverters

## **LOCOMOTIVE OPTIONS AND MODIFICATIONS**

Automatic Equipment Start Stop System Equipped except for 3908,

3913, 3914, 3921, 3922, 3935, 3939, 3950, 3953, 1654, 1656, 3957, 3960,

3965, 3969. 3974

Graham White 944 Air Dryer Equipped

Air Brake System Hardware and Software Knorr CCB 1

Distributed Power Equipped

Gen 3 Fire Screens Equipped except for 3908,

3913, 3914, 3922, 3935, 3939, 3953, 1654, 3960,

3965, 3969. 3974

Control Systems EM2000 EMDEC

Railhead DVR system with 1 forward facing camera and 2 interior cameras.

## **Global Positioning System (GPS)**

GPS Greenwich Mean Time is available on all cab electronics interfaces. GPS time will be written to the event recorder every hour as a universal reference for analysis of event recorder logs.

## **Weight and Ballast**

Nominal loaded weight of the inbound core locomotives, including full supplies is 415,000# +/-5,000#.

Manufacturing tolerance plus or minus 5,000 lbs. Locomotive weight to be equalized between trucks to within 5,000 lbs.

## **Clearance**

The basic locomotive and all options are in compliance with AAR Plate "L" under all loading conditions and wheel sizes.

## **Parking Brake**

Recessed wheel type handbrake located at right rear of long hood. 125 lbs. of force is required to set the hand brake.

## **FUEL SYSTEM**

## **Fuel Tank**

Units to be equipped with impact resistant fuel tank. Fuel tank provides 4,890 gallon capacity, with 100 gallon retention tank. Engine water drain will not be discharged into the retention tank.

One filler pipe located on each corner of tank.

Two float type fill gauges are provided, one per side of the locomotive.

Four Snyder II automatic fuel adapter applied - two per side.

The two inch drain line from the locomotive retention tank to be equipped with McMasters Carr part no. 5589K15 "D" coupler and part no. 5594K15 dust plug.

## **Electronic Fuel Gauge**

Complete application of the existing Pulse Electronic Fuel Gauge shall be retained.
